

# What are Templates?

# Templates

- Why is Bootstrap so popular???
- Because there are so many free templates out there for use.

## Where do you find them?

- <http://getbootstrap.com/getting-started/#example>
- <http://www.bootstrapzero.com/>
- <http://startbootstrap.com/>

## How do you use them?

- First, decide on a template that best supports your content
- Download the code
- Modify the HTML
- Add or remove components

## That's It!

- Even if you don't understand HTML, CSS, or JavaScript it is possible to create a great site using a Bootstrap template.
- But it is **sooooo** much better if you have enough knowledge to change things!
