

Bootstrap 4

Bootstrap 4

- I covered Bootstrap 3 in these slides, but Bootstrap 4 is now available. Does that matter?
- Well, Bootstrap 3 killed Bootstrap 2 – too many incompatible changes.
- Bootstrap 4 is meant to be friendlier.

Changes...

- Bootstrap 4 will be faster (switched from Less to Sass)
- New grid tier
- New customization options
- Moved to rem and em units.

How can I find out more?

- New code can be downloaded at:
<http://v4-alpha.getbootstrap.com/>
- Updates can be found at
<http://blog.getbootstrap.com/2015/12/08/bootstrap-4-alpha-2/>

What should I do?

- Get familiar with Bootstrap 3. That is still where most of the templates are, as well as code you may see in “real life”
- Consider jumping into Bootstrap 4 if you want to be a serious developer. It could be a resume builder.
